Lineage Cell Therapeutics to Present at 2020 Solebury Trout Virtual Investor Conference on May 26, 2020

May 18, 2020

CARLSBAD, Calif.--(BUSINESS WIRE)--May 18, 2020-- Lineage Cell Therapeutics, Inc. (NYSE American and TASE: LCTX), a clinical-stage biotechnology company developing novel cell therapies for unmet medical needs, announced today that Brian M. Culley, Chief Executive Officer, will be presenting at the 2020 Solebury Trout Virtual Investor Conference on May 26, 2020 at 2:30 pm Eastern Time. Interested investors can access the live presentation as part of the Solebury Trout Virtual Conference Series.

The archived presentation will be posted on the Events and Presentations section of Lineage's website the day following the event and will be available for 30 days. Additional videos are available on the Media page of the Lineage website, located at www.lineagecell.com/media/.

About Lineage Cell Therapeutics, Inc.

Lineage Cell Therapeutics is a clinical-stage biotechnology company developing novel cell therapies for unmet medical needs. Lineage's programs are based on its robust proprietary cell-based therapy platform and associated in-house development and manufacturing capabilities. With this platform Lineage develops and manufactures specialized, terminally differentiated human cells from its pluripotent and progenitor cell starting materials. These differentiated cells are developed to either replace or support cells that are dysfunctional or absent due to degenerative disease or traumatic injury or administered as a means of helping the body mount an effective immune response to cancer. Lineage's clinical programs are in markets with billion dollar opportunities and include three allogeneic ("off-the-shelf") product candidates: (i) OpRegen ®, a retinal pigment epithelium transplant therapy in Phase 1/2a development for the treatment of dry age-related macular degeneration, a leading cause of blindness in the developed world; (ii) OPC1, an oligodendrocyte progenitor cell therapy in Phase 1/2a development for the treatment of acute spinal cord injuries; and (iii) VAC, an allogeneic dendritic cell therapy platform for immuno-oncology and infectious disease, in clinical development for the treatment of non-small cell lung cancer and preclinical development for additional cancers and COVID-19. For more information, please visit www.lineagecell.com or follow the Company on Twitter @LineageCell.
