

## Lineage to Be Featured in B. Riley Securities Fall 2021 “Growth Biotech Best Ideas” Virtual Series on October 18, 2021

October 18, 2021

### Fireside Chat with B. Riley Research Scheduled for 12:30pm Eastern

CARLSBAD, Calif.--(BUSINESS WIRE)--Oct. 18, 2021-- [Lineage Cell Therapeutics, Inc.](#) (NYSE American and TASE: LCTX), a clinical-stage biotechnology company developing allogeneic cell therapies for unmet medical needs, today announced that Lineage will be featured in the [B. Riley Securities Fall 2021 “Growth Biotech Best Idea” Virtual Series](#), in a fireside chat hosted by Mayank Mamtani, Managing Director, Senior Biotech Research Analyst and Group Head of Healthcare Research at B. Riley Securities. The fireside chat will feature Lineage management, including, Brian M. Culley, Chief Executive Officer, Kevin Cook, Chief Financial Officer, and Gary Hogge, Senior Vice President of Clinical and Medical Affairs. The Lineage team will be joined by [Jordi Monés, M.D., Ph.D.](#), Director, Institut de la Màcula, Director and Principal Investigator, Barcelona Macula Foundation: Research for Vision. Interested investors can register to join the live event today at 9:30am Pacific / 12:30pm Eastern [here](#).

### Therapeutic Area Expert

[Jordi Monés, M.D., Ph.D.](#), Director, Institut de la Màcula, Director and Principal Investigator, Barcelona Macula Foundation: Research for Vision.

Dr. Monés is an ophthalmologist, macula and vitreoretinal specialist, and macular and retinal degeneration researcher. Dr. Monés earned his medical degree at the University of Barcelona and subsequently specialized in ophthalmology at Barraquer Ophthalmology Centre. He completed his retinal specialist training at the Massachusetts Eye and Ear Infirmary at Harvard University, and at Hospital San José, Monterrey Institute of Technology and Higher Education. He earned his PhD degree in Medicine and Surgery at the University of Barcelona. Dr Monés is dedicated to fighting blindness by supporting and conducting research in retinal disease. For the last 15 years he has been one of the foremost researchers involved in clinical trials for the treatment of age-related macular degeneration. He is currently conducting Phase I, II and III clinical trials. His work has been widely published in scientific journals and he has given more than 200 presentations at international congresses. He is a member of 12 scientific societies.

Interested parties can register to view both the live event and replay on the [Events and Presentations](#) section of Lineage's website. Additional videos are available on the [Media](#) page of the Lineage website.

### About Lineage Cell Therapeutics, Inc.

Lineage Cell Therapeutics is a clinical-stage biotechnology company developing novel cell therapies for unmet medical needs. Lineage's programs are based on its robust proprietary cell-based therapy platform and associated in-house development and manufacturing capabilities. With this platform Lineage develops and manufactures specialized, terminally differentiated human cells from its pluripotent and progenitor cell starting materials. These differentiated cells are developed to either replace or support cells that are dysfunctional or absent due to degenerative disease or traumatic injury or administered as a means of helping the body mount an effective immune response to cancer. Lineage's clinical programs are in markets with billion dollar opportunities and include three allogeneic (“off-the-shelf”) product candidates: (i) OpRegen<sup>®</sup>, a retinal pigment epithelium transplant therapy in Phase 1/2a development for the treatment of dry age-related macular degeneration, a leading cause of blindness in the developed world; (ii) OPC1, an oligodendrocyte progenitor cell therapy in Phase 1/2a development for the treatment of acute spinal cord injuries; and (iii) VAC2, an allogeneic dendritic cell therapy produced from Lineage's VAC technology platform for immuno-oncology and infectious disease, currently in Phase 1 clinical development for the treatment of non-small cell lung cancer.
