

Lineage Cell Therapeutics to Report Third Quarter 2022 Financial Results and Provide Business Update on November 10, 2022

November 3, 2022

CARLSBAD, Calif.--(BUSINESS WIRE)--Nov. 3, 2022-- [Lineage Cell Therapeutics, Inc.](#) (NYSE American and TASE: LCTX), a clinical-stage biotechnology company developing allogeneic cell therapies for unmet medical needs, today announced that it will report its third quarter 2022 financial and operating results on Thursday, November 10, 2022, following the close of the U.S. financial markets. Lineage management will also host a conference call and webcast on Thursday, November 10, 2022, at 4:30 p.m. Eastern Time/1:30 p.m. Pacific Time to discuss its third quarter 2022 financial and operating results and to provide a business update.

Interested parties may access the conference call by dialing (800) 715-9871 from the U.S. and Canada and should request the "Lineage Cell Therapeutics Call" or provide conference ID number 5262180. A live webcast of the conference call will be available online in the [Investors](#) section of Lineage's website. A replay of the webcast will be available on Lineage's website for 30 days and a telephone replay will be available through November 17, 2022, by dialing (800) 770-2030 from the U.S. and Canada and entering conference ID number 5262180.

About Lineage Cell Therapeutics, Inc.

Lineage Cell Therapeutics is a clinical-stage biotechnology company developing novel cell therapies for unmet medical needs. Lineage's programs are based on its robust proprietary cell-based therapy platform and associated in-house development and manufacturing capabilities. With this platform Lineage develops and manufactures specialized, terminally differentiated human cells from its pluripotent and progenitor cell starting materials. These differentiated cells are developed to either replace or support cells that are dysfunctional or absent due to degenerative disease or traumatic injury or administered as a means of helping the body mount an effective immune response to cancer. Lineage's clinical and preclinical programs are in markets with billion dollar opportunities and include five allogeneic ("off-the-shelf") product candidates: (i) OpRegen, a retinal pigment epithelial cell therapy in development for the treatment of geographic atrophy secondary to age-related macular degeneration, is being [developed](#) under a worldwide collaboration with Roche and Genentech, a member of the Roche Group; (ii) OPC1, an oligodendrocyte progenitor cell therapy in Phase 1/2a development for the treatment of acute spinal cord injuries; (iii) VAC2, a dendritic cell therapy produced from Lineage's VAC technology platform for immuno-oncology and infectious disease, currently in Phase 1 clinical development for the treatment of non-small cell lung cancer; (iv) ANP1, an auditory neuronal progenitor cell therapy for the potential treatment of auditory neuropathy; and (v) PNC1, a photoreceptor neural cell therapy for the potential treatment of vision loss due to photoreceptor dysfunction or damage.
