

Lineage to Present at Cantor Fitzgerald 2023 Global Healthcare Conference on September 27, 2023

September 19, 2023

CARLSBAD, Calif.--(BUSINESS WIRE)--Sep. 19, 2023-- [Lineage Cell Therapeutics, Inc.](#) (NYSE American and TASE: LCTX), a clinical-stage biotechnology company developing allogeneic cell therapies for unmet medical needs, announced today that Brian M. Culley, Lineage's Chief Executive Officer, will present at the [Cantor Fitzgerald 2023 Global Healthcare Conference](#), in a fireside chat hosted by Kristen Kluska, Managing Director, Biotechnology Equity Research, Cantor Fitzgerald & Co., on September 27th, 2023 at 9:10am ET. The Cantor Fitzgerald 2023 Global Healthcare Conference is being held at the InterContinental New York Barclay Hotel.

Interested parties can register to view a replay of the presentation on the [Events and Presentations](#) section of Lineage's website. Additional videos are available on the [Media](#) page of the Lineage website.

About Lineage Cell Therapeutics, Inc.

Lineage Cell Therapeutics is a clinical-stage biotechnology company developing novel cell therapies for unmet medical needs. Lineage's programs are based on its robust proprietary cell-based therapy platform and associated in-house development and manufacturing capabilities. With this platform Lineage develops and manufactures specialized, terminally differentiated human cells from its pluripotent and progenitor cell starting materials. These differentiated cells are developed to either replace or support cells that are dysfunctional or absent due to degenerative disease or traumatic injury or administered as a means of helping the body mount an effective immune response to cancer. Lineage's clinical and preclinical programs are in markets with billion dollar opportunities and include five allogeneic ("off-the-shelf") product candidates: (i) OpRegen[®], a retinal pigment epithelial cell therapy in Phase 2a development for the treatment of geographic atrophy secondary to age-related macular degeneration, is being [developed](#) under a worldwide collaboration with Roche and Genentech, a member of the Roche Group; (ii) OPC1, an oligodendrocyte progenitor cell therapy in Phase 1/2a development for the treatment of acute spinal cord injuries; (iii) VAC2, a dendritic cell therapy produced from Lineage's VAC technology platform for immuno-oncology and infectious disease, currently in Phase 1 clinical development for the treatment of non-small cell lung cancer; (iv) ANP1, an auditory neuronal progenitor cell therapy for the potential treatment of auditory neuropathy; and (v) PNC1, a photoreceptor neural cell therapy for the potential treatment of vision loss due to photoreceptor dysfunction or damage.
