NOTES TO FINANCIAL STATEMENTS

GENERAL AND DEVELOPMENT STAGE ENTERPRISE

General - BioTime, Inc. (the Company) was organized November 30, 1990 as a California corporation. The Company is a biomedical organization, currently in the development stage, which is engaged in research and development of synthetic plasma expanders, blood substitute solutions, and organ preservation solutions, for use in surgery, trauma care, organ transplant procedures, and other areas of medicine.

The interim consolidated financial statements presented have been prepared by BioTime, Inc. (the Company) without audit and, in the opinion of management, reflect all adjustments necessary (consisting only of normal recurring adjustments) to present fairly the financial position, results of operations and cash flows at September 30, 1996 and for all periods presented. The results of operations for any interim period are not necessarily indicative of results for a full year.

The consolidated Balance Sheet as of June 30, 1996, has been derived from the consolidated financial statements that have been audited by the Company's independent public accountants. The consolidated financial statements and notes are presented as permitted by the Securities and Exchange Commission and do not contain certain information included in the annual consolidated financial statements and notes of the Company. It is suggested that the accompanying condensed consolidated financial statements be read in conjunction with the audited consolidated financial statements and the notes thereto contained in the Company's Annual Report on Form 10-K for the fiscal year ended June 30, 1996, filed with the Securities and Exchange Commission.

The preparation of the Company's consolidated financial statements in conformity with generally accepted accounting principles necessarily requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities in the consolidated balance sheet dates and the reported amounts of income and expenses for the periods presented.

Development Stage Enterprise - Since inception, the Company has been engaged in research and development activities in connection with the development of synthetic plasma expanders, blood substitute solutions and organ preservation products. The Company has not had any significant operating revenues and has incurred operating losses of \$8,782,827 from inception to September 30, 1996. The successful completion of the Company's product development program and, ultimately, achieving profitable operations is dependent upon future events including maintaining adequate capital to finance its future development activities, obtaining

regulatory approvals for products that may be ultimately developed and achieving a level of sales adequate to support the Company's cost structure.

While the Company successfully completed two public offerings of its common shares and, at September 30, 1996, had remaining cash and cash equivalents of over \$2,000,000, management believes that additional funds will be required for the successful completion of its product development activities.

2. SHAREHOLDERS' EQUITY

The Board of Directors of the Company adopted the 1992 Stock Option Plan (the "Plan") in September 1992, which was approved by the shareholders at the 1992 Annual Meeting of Shareholders, on December 1, 1992. Under the Plan, as amended, the Company has reserved 400,000 Common Shares for issuance under options granted to eligible persons. No options may be granted under the Plan more than ten years after the date the Plan was adopted by the Board of Directors, and no options granted under the Plan may be exercised after the expiration of ten years from the date of grant.

At September 30, 1996, options for the purchase of 220,000 shares under the Plan were held by employees, officers, directors, members of the scientific advisory board and certain consultants. Such options are exercisable at prices ranging from \$1.99 to \$18.00 beginning from one to two years after the grant date and expire after five to ten years from the grant date. Certain options require the achievement of performance criteria. During the quarter ended September 30, 1996, options to purchase a total of 16,500 common shares were issued to consultants at an average option price of \$18.00 per share. The estimated fair value of the services totaled \$25,000 and was recognized in the period. At September 30, 1996, 161,666 options were exercisable at prices ranging from \$1.99 to \$18.00. Options for 70,000 common shares have been exercised as of September 30, 1996.

In September 1996, the Company entered into an agreement with an individual to act as an advisor to the Company. In exchange for services, as defined, to be rendered by the advisor through September 1999, the Company issued warrants, with five year terms, to purchase 40,000 common shares at a price of \$18.75 per share. Warrants for 25,000 common shares vest and are exercisable and transferable immediately; warrants for the remaining 15,000 common shares vest ratably through September 1997 and become exercisable and transferable as vesting occurs. The estimated value of the services to be performed is \$60,000 and that amount has been capitalized and is being amortized over the term of the agreement.

During September 1995, the Company entered into an agreement with a firm to act as its financial advisor. In exchange for financial consulting services associated in part with a plan to secure additional capital, the Company issued to the financial advisor warrants to purchase 100,000 common shares at a price of \$6 per share, and the Company agreed to issue additional warrants to purchase up to an additional 200,000 common shares at a price equal to the greater

of (a) 150% of the average market price of the common shares during the three months prior to grant or (b) \$6 per share. The additional warrants were to be issued in equal quarterly installments over a two year period, beginning October 15, 1995. The Company may terminate the financial advisory agreement on 30 days notice, in which case the next warrant issuance would be accelerated to the date on which notice of termination is given, but no additional warrants would be issued. As of September 30, 1996, the total number of warrants to purchase Common Shares issued was 200,000; 150,000 of which will be exercisable at a price of \$6 per share, 25,000 of which will be exercisable at a price of \$7.32 per share, and 25,000 of which will be exercisable at a price of \$30.04 per share. As of October 15, 1996, warrants to purchase an additional 25,000 shares were issued, which will be exercisable at a price of \$29.33 per share.

During the quarter ended September 30, 1996, the Company recognized \$45,413 in amortization expense for capitalized service costs related to consulting agreements.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Overview 0

Since its inception in November 1990, the Company has been engaged primarily in research and development activities. The Company has not yet generated significant operating revenues, and as of September 30, 1996 the Company had incurred a cumulative net loss of \$8,782,827.

Most of the Company's research and development efforts have been devoted to the development of Hextend(R) and PentaLyte.TM The Company filed an IND with the FDA and received permission to commence Phase III clinical trials of Hextend(R) in human patients. These clinical trials began in October 1996 at the Duke University Medical Center in Durham, North Carolina and are proceeding in accordance with the Company's expectations. Additional studies are being designed to assess the value of Hextend(R) in other surgical applications. The costs of such clinical trials and other studies will be substantial, and it will be necessary for the Company to obtain additional financing in order to complete these studies.

In order to commence clinical trials of new products, it will be necessary for the Company to prepare and file with the FDA an IND or an amendement to the present IND for Hextend(R). The cost of preparing those IND filings and conducting those clinical trials is not presently determinable. It will

be necessary for the Company to obtain additional financing in order to complete any clinical trials that may begin for its new products.

The Company plans to continue to provide funding for its laboratory testing programs at selected medical schools and hospitals for the purpose of developing additional uses of Hextend,(R) PentaLyteTM and other new products, but the amount of research that will be conducted at those institutions will depend upon the extent to which the Company can raise sufficient capital for research in addition to the funding required for the clinical testing of new products. If funding for collaborative research at medical schools and hospitals is curtailed, the Company will have to rely on in-house research, using small laboratory animals.

To address its anticipated need for manufacturing and marketing resources, the Company is negotiating with pharmaceutical companies that, based upon their current product lines and resources, will be able to manufacture and market the Company's products if and when the necessary regulatory approvals are obtained. The acquisition of the Company's own production facilities and the development of the Company's own marketing organization is also being considered in the event that production and marketing arrangements cannot be made with established pharmaceutical companies on terms that the Company deems advantageous. Additional capital will be required in order for the Company to acquire its own production facilities and marketing organization.

Because the Company's research and development expenses, clinical trial expenses, and production and marketing expenses will be charged against earnings for financial reporting purposes, management expects that losses from operations will continue to be incurred for the foreseeable future.

Results of Operations

Revenues

From inception (November 30, 1990) through September 30, 1996, the Company generated \$749,495 of revenues, comprised of \$50,954 from the sale of products and services, and \$698,541 in interest. For the three months ended September 30, 1996, the Company generated \$20,163 of revenues, including \$320 from the sale of microcannulas for research purposes, and \$19,843 in interest. For the three months ended September 30, 1995, the Company generated total revenues of \$44,178, comprised of \$1,380 from the sale of microcannulas for research purposes, and \$42,798 in interest. The decrease in interest income is attributable to the decrease in cash and cash equivalents from 1995 to 1996. Limited test marketing of the Company's laboratory research equipment, through advertisements in trade publications, has resulted in sales of a small number of microcannulas. Although the Company may continue to test market its laboratory research equipment, and to promote its ability to perform research services, the Company's ability to generate substantial operating revenue depends upon its success in developing and marketing its blood substitute and organ preservation solutions and technology for medical use.

Operating Expenses

From inception (November 30, 1990) through September 30, 1996, the Company incurred \$5,205,194 of research and development expenses, including salaries, supplies and other expense items. Research and development expenses increased to \$432,166 for the three months ended September 30, 1996, from \$248,212 for the three months ended September 30, 1995. The increase in research and development expenses is attributable to preparation and intiation of Phase III human clinical trials of Hextend(R); and to an expense of \$25,000 associated with options to purchase the Company's common shares granted to consultants for services performed (See Note 2 to the accompanying financial statements). It is expected that research and development expenses will increase as the Company continues clinical testing of Hextend(R) and commences clinical studies of other products.

From inception (November 30, 1990) through September 30, 1996, the Company incurred \$4,327,128 of general and administrative expenses. General and administrative expenses increased to \$306,353 for the three months ended September 30, 1996, from \$133,373 for the three months ended September 30, 1995. This increase is primarily attributable increased personnel costs and to an amortization expense of \$45,413 associated with agreements the Company entered into with certain financial advisors and consultants in exchange for warrants to purchase the Company's common shares (See Note 2 to the accompanying financial statements).

The Company accounts for options and warrants granted to consultants in conformity with Financial Accounting Standards No. 123. During the period ended September 30, 1996, the Company recorded total expenses of \$70,413 related to warrant and option agreements with consultants. The Company believes that the issuance of the options and warrants to consultants is beneficial as it allows the Company to reduce or eliminate the cash compensation payable to its FDA regulatory experts, medical experts, business and financial consultants. Accordingly, the Company intends to continue this practice in the future.

Liquidity and Capital Resources

Because of the developmental nature of the Company's business, it is unlikely that in the near future the Company will be able to generate internally the funds necessary to carry on its planned operations. The Company expects that its cash on hand will be sufficient to finance the Company's operations for the next 9 months. Since inception, the Company has financed its operations through the sale of equity securities. Presently, the Company intends to seek financing through additional public or private offerings of equity or debt securities. In addition, the Company is seeking financing from pharmaceutical and medical device companies that may be interested in licensing or otherwise acquiring marketing rights to Hextend(R) and other BioTime products

The future availability and terms of equity and debt financings and collaborative arrangements with industry partners cannot be predicted. The unavailability or inadequacy of financing to meet future capital needs could force the Company to modify, curtail, delay or suspend some or all aspects of its planned operations.
